EXPERIENCE

GROWEXX | SOFTWARE ENGINEER

Aug 2022 - Present | Ahmedabad

HOOILI

Hooili is an innovative platform for Healthcare Dispatching. It helps healthcare providers and medical transportation organisations order, communicate and track ambulances in a fully automated way. It reduces data entry time for case managers to book an ambulance. It improves data quality for quicker claim processing.

- A key role is working with UI and integrate the api using RestAPI.
- Making more and more reusable components in React.
- Worked with Google Map for Ambulance tracking.

TechStack: ReactJS, Redux-Saga, React-Bootstrap, REST API

YUDIZ SOLUTIONS | JR. FRONTEND DEVELOPER

May 2021 – July 2022 | Ahmedabad

CRICTRACKER

CricTracker is a website that provides the latest news, scores, updates, and analysis of cricket matches from around the world. The website features live scores of cricket matches, along with statistics of players and teams. It also includes a section for cricket videos, where users can watch highlights, interviews, and other cricket-related content. CricTracker is a valuable resource for cricket fans, providing them with comprehensive coverage of the sport.

- UI development for admin panel pages like Tag, category, cms pages and article modules .
- Integrated API in GraphQL and worked on Cache management.
- Listing Tags, articles, categories, fantasy articles and it's crud operations.
- Worked on Match management like developing the things related to match - scorecard, commentary, overs.
- Integrated live subscription in match management for live score of particular match.
- Worked with fantasy articles and probable XI of matches.
- Used Next Js for SEO so developing the things which increase the chances of seo.
- Worked on Page speed improvement and SEO in Next Js.

TechStack: ReactJS, NextJS, React-Bootstrap, GraphQL
